PROFESSIONAL SUMMARY

Software Developer with experience in building full-stack and Android applications using Kotlin, React, Node.js, and Firebase. Strong in Data Structures, REST APIs, and cloud fundamentals (AWS). Passionate about developing scalable, user-focused solutions and continuously learning modern technologies.

SKILLS

- Programming:** C++, JavaScript, Python, C
- Frontend:** HTML, CSS, Redux
- Backend:** Node.js, Express.js, REST APIs
- Database:** MongoDB, MySQL
- Cloud & Tools:** AWS, Git, Firebase, Cloudinary, npm
- Concepts:** Data Structures, OOP, Authentication, API Design

PROJECTS

GreenTrack App | Android Development

Dec 2025

- Developed an eco-friendly waste collection Android application to promote sustainable practices.
- Built responsive UI using Kotlin in Android Studio, improving user interaction and usability.
- Implemented activity tracking features to manage and monitor waste collection efficiently.
- Structured modular codebase for better scalability and maintainability.
- Performed testing and debugging to ensure stable and smooth performance.

Twitter Clone | Full-Stack

July 2025

- Technologies: React.js, HTML, CSS, JavaScript, Firebase, Redux, MongoDB, Mongoose, Express.js, bcrypt, JWT
- Revamped UI with React.js, reducing page load times by 40% and boosting user engagement by 25%.
- Developed features for seamless browsing and detailed information, enhancing user satisfaction.
- Created and managed RESTful APIs using Express.js and MongoDB, ensuring data integrity with Mongoose.
- Implemented rate limiters to enhance API performance and security, and utilized bcrypt for secure password hashing and JWT for authentication.
- Applied responsive design principles for an optimal viewing experience across devices.

QR Code Generator | Full-Stack

Jan 2025

- Developed backend services to generate scannable QR codes from user-provided URLs.
- Implemented asynchronous processing to improve response time and performance.
- Designed efficient API handling and ensured system reliability through testing.
- Optimized application performance for faster QR generation.

TRAINING

Data Structures & Algorithms — GeeksforGeeks

Jul 2024

- Strengthened algorithm optimization and problem-solving skills.
- Built Bank Management System applying debugging and coding best practices.

CERTIFICATES

- | | |
|---|------------|
| •Python Basics Coursera | April 2025 |
| •The Complete Full Stack Web Development Udemy | Jan 2025 |
| • Introduction to Mobile Android Application Coursera | Nov 2024 |
| • AWS Cloud Practitioner Essentials Coursera | Feb 2024 |

EDUCATION

Lovely Professional University

Punjab, India

- Bachelor of Technology - Information Technology; CGPA: 6.37
- August 2022 - Present

S.R. Public School

Orai, Uttar Pradesh

- Intermediate; Percentage: 71%
- April 2021 - March 2022
- High School; Percentage: 60%
- April 2019 - March 2020
